

Environmental Science Intern

McGinley & Associates is seeking a current student for a paid internship position. The intern will have an opportunity to be a part of a team to work on a variety of projects – primarily focusing on Phase I Environmental Site Assessments (ESAs).

The intern will work directly with an environmental assessor and help with preparation of Phase I Environmental Site Assessment reports. The intern will have opportunities to conduct field work, agency file reviews, historical analysis, and database reviews in order to learn how to prepare and write Phase I reports for a variety of clients. The intern will be able to work remotely if desired, aside from required training, field work, or meetings.

The internship may also include exposure to other environmental services, including soil or groundwater assessment, remediation, air quality compliance, stormwater management, and biological resources surveys, depending on the available workload during the internship and the intern's prior education and experience.

The successful candidate will be enrolled in a four-year college or university majoring in environmental science, biology, ecology, geology, or related field. You must possess a valid driver's license, have a clean driving record, and have the ability to get to various worksite locations as needed. You must have the ability to work outdoors in all weather conditions and various terrains. You must be at least 18 years old. Our preferred candidate will have completed at least two years towards their four-year degree by May 2019 and who will be returning to school in the fall of 2019.

The internship can have an immediate start if the individual is able to dedicate some hours prior to summer. If you are interested, please submit a one-page resume and a cover letter explaining your interest, availability, and why you would be a good fit to hr@mcgin.com.
